

# Fire Hydrant Replacement Program Continues

Lakehurst customers have most likely noticed fire hydrants in some neighborhoods being replaced with new ones. This is part of an on-going, multi-year effort by the District to replace old, non-repairable hydrants. Fire hydrants are an essential part of the overall water system, used not only for fire protection but as a mechanism for flushing the water system to insure water quality.

Each hydrant is maintained on an annual basis and assessed for reliability, age, overall condition and repair parts availability. It is sometimes less expensive to replace the entire hydrant than repair it. The district replaces approximately ten (10) fire hydrant assemblies each year.

## Homeowner Responsibility

Customers often call Lakehurst Water and Sanitation District with the question of who owns and is responsible for maintaining the water and sewer service lines to the property. Service lines are the pipes that extend between the District's water and sewer mains usually located in the street and the customer's residence.

Under Lakehurst regulations, the customer owns and maintains the entire water and sewer service pipe up to, and including, the connection to the District's main, regardless of whether the pipe is located in the street or on the customer's property. These regulations are consistent with most other Colorado water and sewer service providers.

As a general rule, the District will provide limited leak repair services on that portion of the water service pipe located between the District's water main and the customer's property line (curb stop valve). The District does not provide repair services to any portion of the sewer service line whether located in the street or on the customer's property.

***Continued on next page...***

Customers are always encouraged to contact the District office for any water or sewer issues. A field representative will be dispatched to determine if the problem is located on the service line or on the District owned main.

## Lakehurst Cancels Board Member Election

The Designated Election Official (DEO) of the Lakehurst Water & Sanitation District officially canceled the regular election pursuant to State election law on March 2, 2010. There were no new candidates for director, therefore the election was cancelled.

Three candidates, all incumbent, filed the self-nominating and acceptance form and were declared elected following the cancellation of the election on that date. The newly elected Directors will each serve a four (4) year term of office.

Congratulations to the following Directors: Mr. Jerry Newlander, Mr. William "Jake" Schild, and Ms. Jeanne Greenfield. All three newly elected Directors have resided in the District for many years and bring a wealth of knowledge and diversity to the Board.

## Online Bill Pay Through Your Bank

Most banks offer online bill pay through their website payment center. Pay multiple bills at a time; it's quick, easy and safe.

- Save money on postage and the cost of checks.
- From the payment center you can pay bills, set up reminders, see recent activity and any pending payments.
- Simply enroll in Bill Pay.
- Add the vendors you pay each month and your ready to go.

Please check with your banking establishment for rules and regulations that may apply to you.

## 2010 Summer Water Use Program "Guidelines"

Lakehurst Water and Sanitation District Board of Directors adopted 2010 summer water use guidelines and will continue to enforce the permanent water use restrictions for all outdoor irrigation.

Lakehurst Water being a contract distributor of Denver Water is obligated to follow and enforce those portions of Denver's 2010 water use program that have been incorporated into its Operating Rules.

Lakehurst encourages all of its customers to continue wise water use and avoid wasting a valuable resource. Therefore, the District's Board determined that it was necessary to adopt a water use program that mirrors the program adopted by Denver Water. The water saving rules listed below focus on wise water use while discouraging water waste.

### Watering Rules:

1. **No watering with spray irrigation between the hours of 10am and 6pm during the period from May 1 to October 1.**
2. **Routine watering of turf shall be limited to three days per week of your choice.**
3. **Adjust irrigation system programming to suit the needs of each month.**
4. **Turn irrigation system off when it rains.**
5. **Make repairs to irrigation system in a timely manner.**
6. **Do not apply more water than is necessary to establish and maintain a healthy landscape.**
7. **Adjust sprinkler heads for their intended use.**
8. **Do not irrigate during high winds.**
9. **Do not waste water by allowing water to pool on sidewalks, streets or in gutters.**
