12 Ways to Winterize Your Home and Prevent Broken Water Pipes This Winter

October is the perfect month to winterize. There are many things that homeowners can do to make the winter months more comfortable.

- Before winterizing your sprinkler system, check for leaks and broken sprinkler heads and have them repaired to expedite your spring irrigation.
- Winterizing your sprinkler system is simple: turn water off, drain valves, and blow out with compressed air.
- Drain and disconnect your swamp cooler before temperatures drop below freezing.
- Clean your gutters; once the leaves fall, remove debris and rinse with a garden hose so melting snow and rain can drain properly. Clogged drains can cause water to pool and freeze, producing hazardous conditions.
- Make sure that garden hoses are

disconnected from outside faucets.

- Check your furnace to make sure it's working before the cold days of winter descend and don't forget to change the filters.
- Insulate any gaps between the foundation and the framing of homes, and insulate areas that have water pipes in outside walls to help protect against freezing.
- Seal outside leaks with weather-resistant caulk. Use masonry sealer for brick areas, which withstands the elements of weather.
- Remove screens and replace with storm windows.
- Insulated covers for outside faucets are available at hardware stores.
- Reversing your ceiling fan will push warm air down forcing it to recirculate; Blades should be turning clockwise.
- Keeping garage doors closed during very cold weather will help to prevent water pipes above the garage or in garage walls from freezing.

Baby and Body Wipes Clog Pipes!

"Many items marketed as flushable including disinfecting wipes, baby wipes, diapers, paper towels/napkins, feminine hygiene products, toilet bowl scrub pads, and bathroom wipes, do not breakdown in the wastewater system.

Unlike toilet paper, which breaks down easily, some of these materials contain insolubles. The materials can clog and block sewer mains.

Properly dispose of wipes into the trash; only human waste and toilet paper should be flushed."
