12 Ways to Winterize Your Home and Prevent Broken Water Pipes This Winter

October is the perfect month to winterize. There are many things that homeowners can do to make the winter months more comfortable.

- Before winterizing your sprinkler system, check for leaks and broken sprinkler heads and have them repaired to expedite your spring irrigation.
- Winterizing your sprinkler system is simple: turn water off, drain valves, and blow out with compressed air.
- Drain and disconnect your swamp cooler before temperatures drop below freezing.
- Clean your gutters; once the leaves fall, remove debris and rinse with a garden hose so melting snow and rain can drain properly. Clogged drains can cause water to pool and freeze, producing hazardous conditions.
- Make sure that garden hoses are disconnected from outside faucets.
- Check your furnace to make sure it's working before the cold days of winter descend and don't forget to change the filters.
- Insulate any gaps between the foundation and the framing of homes, and insulate areas that have water pipes in outside walls to help protect against freezing.

Continued on next page...

- Seal outside leaks with weather-resistant caulk. Use masonry sealer for brick areas, which withstands the elements of weather.
- Remove screens and replace with storm windows.
- Insulated covers for outside faucets are available at hardware stores.
- Reversing your ceiling fan will push warm air down forcing it to recirculate; Blades should be turning clockwise.
- Keeping garage doors closed during very cold weather will help to prevent water pipes above the garage or in garage walls from freezing.

If Your Water Bill Seems High... It Could be a Leak

You may be surprised at how much water waste there can be with a simple dripping faucet, leaky toilet, and other minor leaks that are sometimes difficult to detect. Below is a 'leak chart' that shows just how much water can be wasted even in the smallest of leaks.

WATER WASTE AT 40 lbs. PRESSURE

A 1/32" leak wastes	180 gallons in 24 hours
A 1/16" leak wastes	690 gallons in 24 hours
A 1/8" leak wastes	2,760 gallons in 24 hours
A 1/4" leak wastes	11,030 gallons in 24 hours

Voice Activated Suspension Notification Program

Lakehurst continuously strives to notify a customer of past due balances prior to suspension of water service. In our ongoing efforts to provide timely notice of service interruptions, the district will continue to mail suspension notices on the 5th of each month. If your account is delinquent, a voice notification will be sent the Monday prior to turn off. This service is only available to customers who have provided us with a current telephone number. It is the responsibility of each customer to notify us of any changes. If you would like to take advantage of this service complete the attached form and include with payment or go to our website at www.lakehurstwater.org/forms and complete online.

Voice Activation Form

Lakehurst Water & Sanitation District is in the process of updating our customer database. We will be notifying customers of impending suspension of their water service due to delinquency. If you wish to take advantage of this service, or make changes to your current account, please complete the information below. (Limit of two phone numbers and one email address.)
