Denver Water Implements 2019 Summer Water Use Program

Denver Water has implemented its 2019 Summer Water Use Program, which Lakehurst Water and Sanitation District, as a contract distributor, is legally obligated to follow and enforce.

Effective May 1 to October 1, customers may water no more than three days per week and must adhere to the watering rules laid out below.

1. Water during cooler times of the day – lawn watering is **NOT allowed between 10 a.m. to 6 p.m.**
2. Newly planted seed or sod may be watered, as necessary, for up to 21 days. After 21 days, routine watering is limited to no more than three days per week and not between 10 a.m. and 6 p.m.
3. Routine watering of turf is limited to three days – **OF YOUR CHOICE** – per week.
4. Turn your irrigation system off when it rains and during high winds.
5. Make repairs to irrigation systems in a timely manner and adjust sprinkler heads appropriately.
6. Do not waste water by allowing it to pool on sidewalks, gutters or streets.

Continued on next page...

7. Do not apply more water than is necessary to establish and maintain a healthy landscape.

Report Water Waste

If you see water waste that does not meet these rules, please call Lakehurst Water at 303-985-7895.

2019 Consumer Confidence Report Is Available on the District Website

Each year the United States Environmental Protection Agency (EPA) mandates that all public water systems provide their customers with a water quality update called the Consumer Confidence Report (CCR).

Since Lakehurst operates under a contract with Denver Water, it is Denver Water's duty to monitor and report on the quality of our treated water.

The CCR from Denver contains information regarding water quality regulations as well as recent testing results and evaluations.

District customers may log onto Lakehurst's website - www.lakehurstwater.org - to view the CCR, or call the District office - 303-985-7895 - or Denver Water - 303-628-6000 - with questions.

New Water Line to be Included with Quincy Road Rehabilitation Project

Lakehurst Board of Directors entered into an Intergovernmental Agreement (IGA) with Jefferson County to replace approximately 8,600 feet of water pipe in conjunction with the County's *"West Quincy Avenue (Tufts to Simms) Road Rehabilitation Project"*. The County plans to implement the project in three (3) separate phases.

- Phase 1 of the project in 2019, shall consist of improvements from S. Simms Street to South Swadley Court, and includes replacing 700 feet of water line.
- Phase 2 of the project in 2021, shall consist of improvements from S. Swadley Court to approximately S. Arbutus Way which will include replacing over 5,000 feet of water line.

- Phase 3 shall consist of improvements from South Arbutus Way to West Tufts Avenue. Lakehurst's water main replacement schedule will coincide with the County's schedule, replacing the final 2,600 feet of pipe in 2022.

The District planned to replace the existing 12-inch pipe due to numerous breaks and age of pipe. The District will attain a cost-effective replacement project by collaborating with Jefferson County. Entering into the agreement with the County is very beneficial to Lakehurst District customers for several reasons.

- First and foremost, it represents a collective cooperation between Jefferson County and Lakehurst that ultimately decreases the duration of road disruption for all.
- Provides a substantial cost savings for Lakehurst by not having to replace asphalt since that is already included in the overall County project.

Lakehurst always strives to take the most proactive, feasible and financially responsible approach with all its capital and rehabilitation projects. If you should have any questions regarding this project with concerns to the water line, please feel free to contact the District Manager at the number listed below.

Nozzle & Controller Rebates

Rotary/high-efficiency sprinkler nozzles: up to \$3 rebate per sprinkler head

- Eligible models include Hunter MP[®], Rain Bird[®], Toro[®] Precision[™] and K-Rain[®] rotary nozzles.
- Purchases of between 10 and 100 sprinkler nozzles are eligible for rebate.
- One-time rebate per residence per a 10-year period.

WaterSense[®]-labeled smart sprinkler system controller (up to a \$75 rebate)

- Only WaterSense-certified smart irrigation controllers are eligible for a Denver Water rebate.
- One-time rebate per residence per a 10-year period.
- Make sure your controller is set to follow the watering rules.
