Denver Water Implements 2020 Summer Water Use Program

Denver Water has implemented its 2020 Summer Water Use Program, which Lakehurst Water and Sanitation District, as a contract distributor, is legally obligated to follow and enforce.

Effective May 1 to October 1, customers may water no more than three days per week and must adhere to the watering rules laid out below.

1. Water during cooler times of the day – lawn watering is **NOT allowed between 10 a.m. to 6 p.m.**
2. Newly planted seed or sod may be watered, as necessary, for up to 21 days. After 21 days, routine watering is limited to no more than three days per week and not between 10 a.m. and 6 p.m.
3. Routine watering of turf is limited to three days – OF YOUR CHOICE – per week.
4. Turn your irrigation system off when it rains and during high winds.
5. Make repairs to irrigation systems in a timely manner and adjust sprinkler heads appropriately.
6. Do not waste water by allowing it to pool on sidewalks, gutters or streets.

Continued on next page...

7. Do not apply more water than is necessary to establish and maintain a healthy landscape.

Report Water Waste

If you see water waste that does not meet these rules, please call Lakehurst Water at 303-985-7895.

2020 Consumer Confidence Report Is Available on the District Website

Each year the United States Environmental Protection Agency (EPA) mandates that all public water systems provide their customers with a water quality update called the Consumer Confidence Report (CCR).

Since Lakehurst operates under a contract with Denver Water, it is Denver Water's duty to monitor and report on the quality of our treated water.

The CCR from Denver contains information regarding water quality regulations as well as recent testing results and evaluations.

District customers may log onto Lakehurst's website - www.lakehurstwater.org - to view the CCR, or call the District office - 303-985-7895 - or Denver Water - 303-628-6000 - with questions.

Reoccupying a building after an extended closure: Guidelines for protecting water quality.

When buildings are unoccupied for extended periods of time and water is not being regularly used, the water can sit and become stagnant, causing water quality to degrade over time.

Lakehurst Water is sharing guidelines for businesses on how to clear or flush the water in a building's internal water system before the building is reoccupied. These guidelines also include a link to similar guidelines from the Centers for Disease Control and Prevention.

The goal is to replace stagnant water in the building's water system with fresh, high-quality water from Lakehurst Water's distribution system. Lakehurst

Water recommends working with your building's engineer or facility manager for this process.

Guidelines: It is important to follow these in the order outlined below.

1. Turn on the **cold** water inside the building (break room sinks, drinking fountains, utility closets, restrooms, etc.) on each floor.
 - a. Start from the furthest point away from where water enters the building (e.g., for a building with five floors, start on the fifth floor and work your way to the first floor.) Remember to run only the cold water.
 - b. The cold water has been successfully flushed when you feel the water temperature go from slightly warm to cold.
2. Flush hot water storage tanks (boiler and/or hot water tanks per manufacturer's flushing instructions) to displace stagnant/discolored water with fresh water.
3. Repeat step 1 using **hot** water.
 - a. The hot water has been successfully flushed when you feel the water temperature turn from warm to hot.
4. Flush and perform preventative maintenance on point-of-use devices or systems, such as cooling towers, systems providing additional water treatment, etc., per the manufacturer's recommendations as applicable.

Once all domestic water service lines, internal plumbing and point-of-use devices/systems are flushed/properly maintained, the building can be occupied.

The Centers for Disease Control and Prevention have also provided comprehensive guidelines for specific industries, such as hotels or restaurants.

Lakehurst Water recommends working with your building's engineer or facility manager for this process. If you have questions for Lakehurst Water, please contact us Monday through Friday, from 8:00 a.m. to 4:30 p.m. at 303-985-7895.
